## CLEARVIEW FENCING

Providing exceptional security to your property!

# Who are we?

## We are Crystal ClearView Fencing

Founded in early 2021, Crystal Clearview-Fence has been an industry leader since its inception. We take pride in supply only the highest quality materials and fittings with all our fencing ranges. Whether you need additional security features such as electric fencing, security extensions, perimeter sensor monitoring systems or just an aesthetically pleasing fence that looks great and provides exceptional security to your property. We are your go-to company.

Crystal Clearview Fence is one of Zimbabwe largest and most respected fencing companies, successfully servicing Urban areas and for more than a year. We have a dedicated sales force that offers customers on-site quotes and advice and are renowned for their prompt and professional service. Our Installation teams are highly skilled and are trained to ensure that the customers' expectations and objectives are fulfilled. Crystal Clearview offers unmatched back-up service as well as an installation guarantee to ensure our customers feel confident in our brand and service.

# Our Products

**COATINGS** - Our range of products has been designed to offer customers a fully customizable fencing solution, from welded mesh panels to a choice of spikes and posts, giving them the ability to build the perfect and specific security barrier for your lifestyle needs. In addition, we have three different coating options to choose from, which round off the overall picture and give any fencing solution the desired finishing touch.

**GALVANISE** - A Cost effective and elegant solution for inland applications. All wire fencing panels are fabricated from pre-galvanized materials and available in a light or heavy galvanised finish.

**POLYESTER POWDER** - Exterior, UV resistant Polyester Powder Coating available as a final finish to all pre-galvanised wire fence panels and components.

**COASTAL FUSION BOND** - A Zinc Enriched Primer is applied to pre-galvanised wire fence panels and subsequently coated with an exterior Polyester Powder Coat. Recommended for Coastal applications.

**PLASCOAT / PVC** - Plascoat/PVC final coat on pre-galvanised wire fence panels for Coastal applications.

**ANTI-TAMPER SCREWS** - Anti-tamper screws are available as self-drillers (in galvanized or stainless steel) as part of a rivet solution and used with Square Tube posts during installing. They can only be applied or removed with a uniquely designed key.

**MULTI & MAXI SPIKES** - Our exceptionally designed spiking mechanisms can be secured to any of our BRC-thru fences offering additional security to your property.

**SHEAR-OFF NUTS & BOLTS** - This system is used for application to the IPE posts and prevents subsequent removal by its shear off ability. Available in galvanised and stainless steel.

**FIXATORS** - Our uniquely designed fixating solution ensures maximum wire contact is achieved at all times, providing customers with a strong, reliable and secure barrier solution that protects their property.

# Product Range

We have designed our range of products in such a way that it offers you a completely customizable fencing solution, from welded mesh panels to a selection of spikes and posts, which affords you the opportunity to build the perfect security barrier specific to your lifestyle requirements. In addition to this we have three different coating options to choose from which completes the overall look and adds the desired finishing touches to your fencing solution.

## PERIMETER FENCES

Although the wire aperture on these fences are much larger than those on the high secure or economical product ranges, it certainly does not compromise on strength or reliability. These fences are designed to secure the perimeter of recreational facilities, sports fields and schools.

## ECONOMICAL FENCES

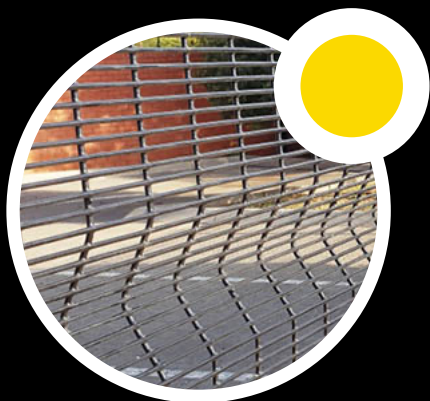

This range serves budget conscious customers with a security solution that provides maximum protection at an affordable price. Ideal for commercial use on properties situated within secure holdings, internal fences for residential estates and agricultural applications.

## HIGH SECURITY

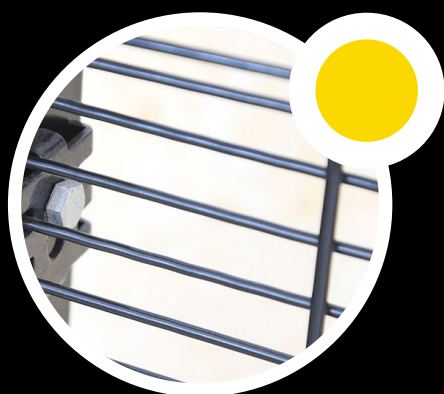

The compact wire aperture on this product provides a maximum security solution to properties situated within high risk areas. Ideal for securing the perimeter of Industrial properties, Office parks, Shopping malls and Estates. Although the design is compact, these fences maintain their see through appearance.

# Product Types

## HIGH SECURITY

Wire Arrangement	4mm secure vertical
Mesh (mm)	75mm X 127mm
Sheet size (m)	1.8/2/2 4.3(h) X 2.5/3(W)
Rigidity	4 V bends

## MEDIUM SECURITY

Wire Arrangement	4mm secure vertical
Mesh (mm)	75mm X 25mm
Sheet size (m)	1.8/2/2 4.3(h) X 2.5/3(W)
Rigidity	4 V bends

## LOW SECURITY

Wire Arrangement	4mm (main) X 3mm (cross)
Mesh (mm)	75 (vert) X 50 ( Horiz)
Sheet size (m)	1.8/2/2 4.3(h) X 2.5/3(W)
Rigidity	4 V bends

Our post designs allow customers to tailor make their fence's appearance to their desired style and/or architectural requirements. The technical specifications of your fence is not altered through the application of either one of these posts.

We also offer a very unique spiking mechanism which can be secured onto any of our fences for added security.
